Drawing with Simple Shapes

Draw real objects that look like circles, squares, rectangles, and triangles

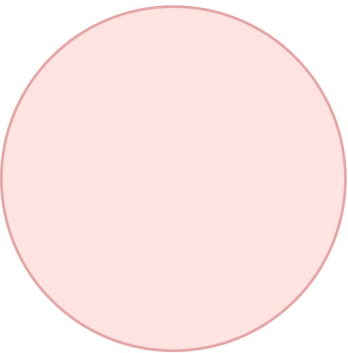

I can create recognizable objects using simple shapes.

From Shapes to Objects

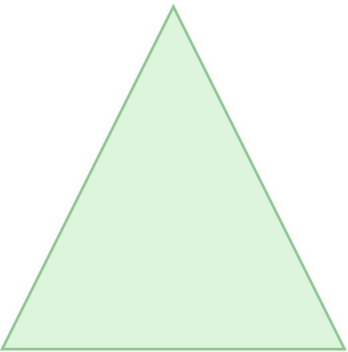

By the end, you can identify everyday objects that match basic shapes.

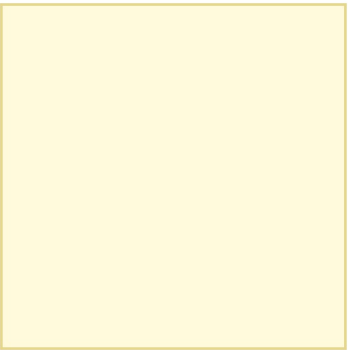

Draw or write two real-world objects that are shaped like a **Rectangle**:

Circle

Triangle

Square

Shape Scavenger Hunt

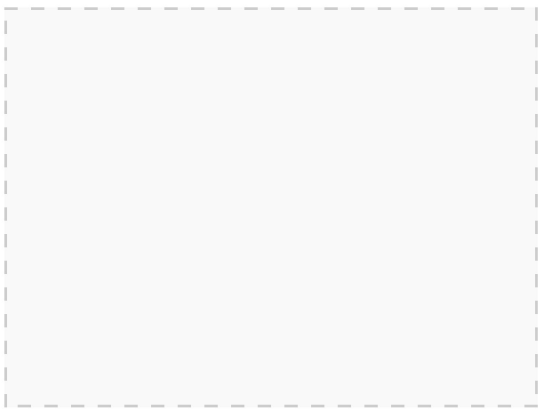

Look around you! Find objects in your environment that contain the shapes below. Draw each object and label what you found.

Example:

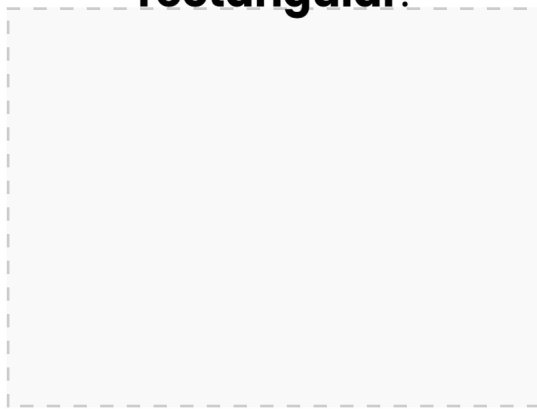

*This yield sign is an example of a **triangle** in the real world. Now it's your turn!*

Find something **circular**.

Find something **rectangular**.

Find something **triangular**.

Self-Assessment: Which shape was easiest to find in real objects? Why do you think that is?
