## **Grade 3 – Count Unit Squares To Find Area – Easy**

1. A rectangle has 2 rows and 4 unit squares in each row. How many unit squares in total?
2. A rectangle has 3 rows and 2 unit squares in each row. How many unit squares in total?
3. A rectangle has 2 rows and 2 unit squares in each row. How many unit squares in total?
4. A rectangle has 3 rows and 3 unit squares in each row. How many unit squares in total?
5. A rectangle has 2 rows and 3 unit squares in each row. How many unit squares in total?
6. A rectangle has 3 rows and 3 unit squares in each row. How many unit squares in total?
7. A rectangle has 3 rows and 2 unit squares in each row. How many unit squares in total?
8. A rectangle has 4 rows and 2 unit squares in each row. How many unit squares in total?

# Grade 3 – Count Unit Squares To Find Area – Easy – Answer Key

1. A rectangle has 2 rows and 4 unit squares in each row. How many unit squares in total?
2. A rectangle has 3 rows and 2 unit squares in each row. How many unit squares in total?
3. A rectangle has 2 rows and 2 unit squares in each row. How many unit squares in total?
4. A rectangle has 3 rows and 3 unit squares in each row. How many unit squares in total?
5. A rectangle has 2 rows and 3 unit squares in each row. How many unit squares in total?
6. A rectangle has 3 rows and 3 unit squares in each row. How many unit squares in total?
7. A rectangle has 3 rows and 2 unit squares in each row. How many unit squares in total?
8. A rectangle has 4 rows and 2 unit squares in each row. How many unit squares in total?
