

Name: _____

Date: _____

Measuring with Fun Units!

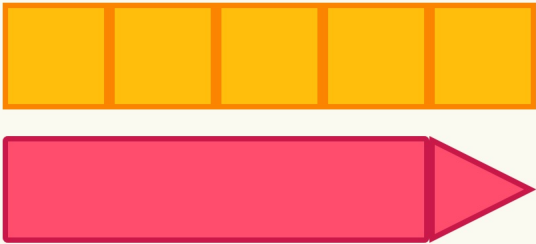

To find out how long something is, we can **measure** it! We don't always need a ruler. We can use everyday objects like paper clips, blocks, or even pencils. We just line them up end-to-end and count how many it takes to match the length.

Let's See How It's Done!

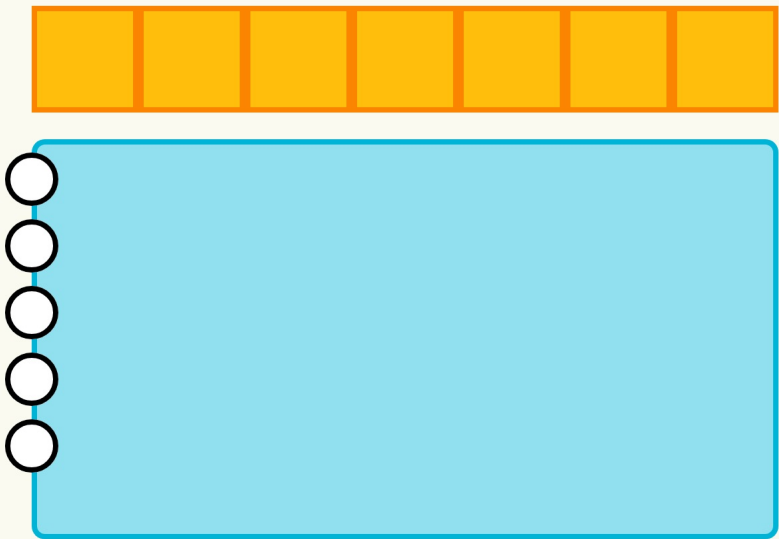

The book is **5** paper clips long!

Your Turn to Measure!

The crayon is _____ cubes long.

The notebook is _____ cubes long.

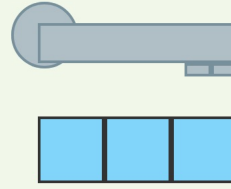

More Measuring Fun!

3. How many paper clips long is the comb?

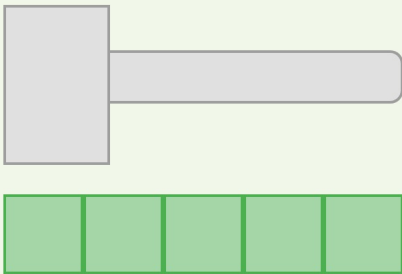

It is _____ paper clips long.

4. How many cubes long is the key?

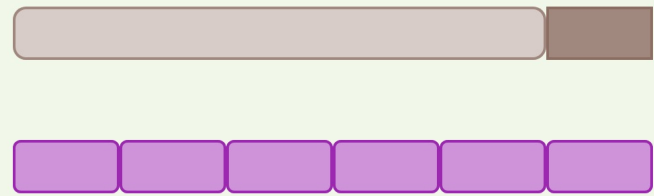

It is _____ cubes long.

5. How many blocks long is the hammer?

It is _____ blocks long.

6. How many erasers long is the paintbrush?

It is _____ erasers long.

Extension: If you have time...

Find one object in the classroom. Draw it below. Write what you measured and how many units long it is.

Object I measured: _____

Length: _____
