Unit 1 - Variables (Easy)

1. What is the variable in: $a - 2$?

2. What is the variable in: $n - 2$?

3. If n represents a number, what does it stand for?

4. If $y = 4$, what does y equal?

5. What is the variable in: $a - 2$?

6. If $y = 6$, what does y equal?

7. If x represents an unknown number, what does it stand for?

8. If $a = 4$, what does a equal?

Unit 1 - Variables (Easy) - Answer Key

1. What is the variable in: a - 2?

   a

2. What is the variable in: n - 2?

   n

3. If n represents a number, what does it stand for?

   a number

4. If y = 4, what does y equal?

   4

5. What is the variable in: a - 2?

   a

6. If y = 6, what does y equal?

   6

7. If x represents an unknown number, what does it stand for?

   an unknown number

8. If a = 4, what does a equal?

   4
